

Second Class Plan for week of May 18th

The following is a suggestive work plan for the coming week.

Please email me samples work at mpettersen2nd@gmail.com, by taking photos of their work and sending them as attachments. Thank you.

Again, I have included this week some SESE work (Science, Geography and History), the reason being that we not getting the opportunity to do it in school. Its online work, from the scholastic website, and not mandatory.

This coming Saturday, nineteen boys in the class were to receive their First Communion.

This is a very special day for the children and their families of Roman Catholic faith. It is unfortunate that they cannot have their special day this week, but we look forward to having an extra special day in the not too distant future.

Have a lovely week.

Thanks a million

As an FYI and to simply the individual day sheets, the following are extra maths resources that are optional

SESE:

How are your vegetables coming along? My peas are the length of my index finger.

Tomorrow, I will put them outside for the day and bring them back in at night. This is called weathering, or getting used to the outside weather, where they'll be colder, and they will have to learn to adapt to the wind.

On Friday, I will plant them outside, up against a trellis. Remember, your pea plants will grow to about one meter tall and as it grows, it will need to cling onto something. Try to give it a sunny spot in your garden, with not too much wind.
