37. Science/Art: Marble Run

As we should be studying forces and movement in Science in school, I thought you might be able to give this activity a go. It is based on the idea of simple machines for movement. Simple machines are simple ideas that people use to help make it easier to move things. They are things like slopes (inclines), pulleys, wheels and

levers. You will find more information on Simple Machines in this youtube video <https://www.youtube.com/watch?v=fvOmaf2GfCY>

This marble run uses slopes (inclines) to get the marbles from one place to another. Have a look at the powerpoint:

[https://drive.google.com/file/d/1UuDXtDyJW2S0JIByAa9v8DfgU\\_BQKPhI/view?usp=sharing](https://drive.google.com/file/d/1UuDXtDyJW2S0JIByAa9v8DfgU_BQKPhI/view?usp=sharing)

Can you design a marble run using ideas from the powerpoint or your own ideas? I would love to see pictures/videos for our newsletter.
